To Whom it May Concern:

I was the supervisor for Thomas Petazzoni during his internship in the hp info_center. The internship was for a duration of 4 weeks. The internship took place in the HP info_center in Germany, which is a co-managed environment of HP and SellByTel.

Thomas carried out a project to optimize our customer database. The project included the design and implementation of the database using MySQL, development of Perl Scripts for conversion processes and the development of a Web front-end using PHP.

Thomas could easily complete the project in the given time and implement additional functionalities. His work was extraordinary and exceeded our expectations. His knowledge in the listed development languages /database is very deep. He didn't need any learning time and could start to work efficiently the first day he arrived.

Thomas is a motivated self-starter, who rarely needed supervision. He exceeded all expectations. He was also willing to do additional work in his own time, for instance writing the project documentation. From a social perspective he is also very open and was soon able to approach the people in our team.

I can highly recommend Thomas for any future IT internships or employment. He is a highly motivated individual with great technical expertise. If you would like to discuss his attributes in more detail, please do not hesitate to contact me.

Yours sincerely,
